The Challenge

91% of cyber-attacks begin with email, making it the easiest way for hackers to gain access to an organization.
Highly-sophisticated and targeted campaigns are widespread, with Ransomware, Phishing, and Social Engineering Scams among the most lucrative threat types utilized by cybercriminals.

Small & Medium Sized Businesses are Most Targeted
Due to ever increasing cybersecurity budgets, it is becoming more difficult and expensive for cybercriminals to successfully penetrate large corporations' defenses.
Instead, they focus on easy wins with small and medium businesses that have far fewer resources dedicated to preventing cybercrime. Protection against advanced email attacks is no longer a luxury, it is a necessity.

Protecting Organisations Against Their Biggest Vulnerability - Email.
