Heimdal®

Cybersecurity solutions made simple

Heimdal Security has a fully integrated network & endpoint protection suite with ground-breaking live threat intelligence, appraised by the FBI, and with products recommended by the RBS Banking Group.

The only vendor in the market to have an offering to combine: next generation anti-virus, traffic filtering down to DNS level on the endpoint, and silent, automated third-party patch management.

Threat Prevention

DARKLAYER GUARD™

DarkLayer Guard and VectorN Detection improve your security:
• **Live Threat Intelligence:** Real-time protection from malware infrastructure.
• **Threat To Process Correlation (TTPC):** Maps out security-critical points.
• **Predictive DNS:** AI & ML predict and block malicious domains before they host harmful content.

DarkLayer Guard: Essential HIPS
• **2-Way Traffic Filtering:** Advanced, unique protection.
• **Customisable Content Filtering:** Category-based filtering.
• **Zero Hour Exploit Mitigation:** Prevents ransomware and data leaks.
• **Threat To Process Correlation:** Identifies attacking processes and provides endpoint HIPS.

Patch & Asset Management

• **Proactive Vulnerability Management:** For Windows and third-party apps.
• **Automatic Patching:** Silent, scheduled updates globally.
• **Software Inventory Management:** View and manage all software.
• **Centralised Admin Console:** Full visibility and compliance tools.
• **Compliance:** Meets DPA 2018, GDPR, UK PSN regulations.
• **Infinity Management Module:** Global software deployment, encrypted packages, customizable catalogues, supports MSI/EXE installers.

Next-Generation Endpoint Antivirus

CYBER SECURITY 7

• **Comprehensive Detection** • **Low Impact Scanning**
• **Real-Time Cloud Scanning** • **Sandbox and Backdoor Inspection**
• **Threat Prevention Integration** • **Free MDM**
